

# Tower Silos

*Choice of Innovative  
New Farm*

*Best Feed  
Quality*

## **International Silo Assoc.**

*Three new concrete stave silos:  
20 x 80, 20 x 70, 14 x 60*

"After farming my entire life on a family run farm, we relocated to a 100 acre farm. In June of 2015, construction started on our new 122' wide x 360' long composting pack barn and three tower silos.

We have always used tower silos and believe the feed quality is superior. Filling the silo requires only two people which we appreciate, as well as, the convenience. The upright silos only use a minimal area while yielding high volume feed."

*Paul Livingston and Family, Owners*

**Gore Ridge Farms in Schomberg, Ontario. Paul works 485 acres and milks 55 Holstein cows with a robotic milking system.**
