

# Tower Silos

*Convenience and  
Ease of Filling  
and Feeding*

*No Mess*

## **International Silo Assoc.**

“Throughout the years we’ve had experience with tower silos and ag bags, but when we purchased this farm three years ago we built three new tower silos because that is our preferred method of feed storage.

We were surprised to see firsthand how the steers preferred feed from the tower silos. When we fed from a bag, switched to a tower silo and went back to the bag, we actually had to mix the feed from the silo with the feed from the bag to get them to eat it!

We appreciate the convenience and ease of both filling and feeding from the tower silos. Tower silos take up much less space and there is no mess. We don’t have to battle with the mud and snow.”

*Ralph & Sara Trego, Owners*

**Whispering Springs Farms LLC in Turbotville, Pennsylvania  
232 Acres and 150 Steers**

*Three silos: Two 20 x 90 and a 20 x 50*
