

# Progressive Farm with Tower Silos

"This is the farm I grew up on and took over from my parents thirty years ago. Our farm has undergone many changes in the past year and a half. We built a new barn, increased our herd from 50 to 180 cows, went to robotic feeding and milking and put up our third tower silo, a 30 x 120. This farm has always had tower silos. Last year we did use some ag bags for rye. I prefer using the tower silos for several reasons. We have very little feed spoilage, we don't have to be out in the snow and rain and the feed (silage) is high quality. The towers silos just make it a lot nicer place to work."

*Galen Nolt and Family - Second Generation Farm*

**Westview Farm in Peach Bottom, Pennsylvania. They milk 180 cows with a robotic milking system.**

**They have 325 tillable acres and three tower silos.**

*Contact your local feed handling equipment dealer or silo company.*
