

# Tower Silos Stand the Test of Time

"This traditional family farm has always used tower silos and never felt the need to try any other method of feed storage. We get better quality feed in a timely manner. Filling the silos is an easy process and it is a lot less labor and man power which in turn saves us money. Tower silos have served us well and continues to meet the needs of our farm going forward."

- Doug Rauls, (Third Generation) and Joseph Rauls (Fourth Generation)

Rauls Family Farm located  
in Dane, Wisconsin  
milks 70 cows, farms 220 acres  
and has four tower silos.
